

Tentative Schedule

Labs are generally on Mondays and lectures on Tuesdays and Thursdays. However, we will at times switch them around to ensure a better flow of the material.

The labs rely on slides. The slides and/or a handout will be provided. The blackboard is used in lectures and you are expected to take notes on your own.

- Week 1: First class on Thursday, September 10.
 - Introduction to course (slides). Lecture to set the stage for the first 4 weeks (blackboard).
- Week 2: Week of September 14.
 - Lab: Convexity (slides, handout).
 - Lectures: Consumer choice and revealed preferences (Chapter 2).
- Week 3: Week of September 21.
 - We may switch the Monday lab and the Thursday lecture for better flow.
 - Lectures: Classical demand theory (Chapter 3).
 - Lab: Optimization (slides, handout).
- Week 4: Week of September 28.
 - Lab and lectures are cancelled.
- Week 5: Week of October 5.
 - We may switch the Monday lab and the Thursday lecture for better flow.
 - Lectures: Finishing classical demand theory.
 - Lab: Integration, differential equations, and their use in recovering preferences from observed demand (slides, handout).
- Week 6: Week of October 12.
 - No lab (Thanksgiving).
 - No Tuesday lecture (extra day off for Thanksgiving).
 - Thursday lecture: Aggregate demand (Chapter 4).

- Week 7: Week of October 19.
 - Lab: Comparative statics (slides, handout).
 - Lectures: Aggregate demand and welfare in partial equilibrium with quasilinear utility (Chapter 4, optional Chapter 10).
- Week 8: Week of October 26.
 - Lab on the Monday is replaced by a lecture.
 - Lectures (Monday and Tuesday): Choice under uncertainty (Chapter 6).
 - Thursday, October 29: MIDTERM
- Week 9: Week of November 2.
 - Lab: Correspondences and fixed point theorems (slides).
 - Lectures: Finishing choice under uncertainty, starting general equilibrium (Chapter 15).
- Week 10: Week of November 9
 - Lab: Review of the theory of the firm (slides, Chapter 5).
 - Lectures: More general equilibrium (Chapter 17).
- Week 11: Week of November 16.
 - Lab: Existence of Walrasian Equilibrium, using a fixed point theorem (slides).
 - Lectures: Welfare theorems (Chapter 16).
- Week 12: Week of November 23.
 - Lab: A selection of topics in general equilibrium (slides, optionally Chapters 18 and 19)
 - Lectures: Social choice (Chapter 21).
- Week 13: Week of November 30.
 - Lab on Monday: Held in reserve for other topics. Note: Friday this week follows a Monday schedule to compensate for Thanksgiving. We may or may not meet.
 - Lectures: Welfare (Chapter 22) and other topics, time allowing (Chapters 11 and 12).
